

The Devil with the Three Golden Hairs (notes on required cast members)

For this play we will need between 5 and 8 people (2-4 women and 3-4 men). There are a total of 20 characters, so all of the cast will be required to play anything between 2 and 6 characters. The exception is one (young-ish) male member of the cast who will play only one character (the "Lucky Child").

Most of the roles can be played by males or females of almost any age, but we will need 2 young(ish) people (one male and one female) that are (or are able to play!) 18-25 year-olds.

Expect to use mime in varying degrees. A variety of voices/accents/dialects will also be necessary to distinguish the various characters (this means you still stand a chance of getting a part even if English isn't your mother tongue!)

Rehearsals will tend to be evenings during the week, with Sundays added later on in the schedule. Saturdays will be avoided like the plague and only included in dire necessity! Because of the multiple roles it will probably be necessary to attend most of the rehearsals, though I will try and plan these, so that not everyone has to be there every time.

One other important note: this play is the FEST entry to FEATS, a yearly play competition held this year in Antwerp. You will need to be able to travel to Antwerp for the 3 nights of the festival, May 25th to May 28th!
